

UTOPIA

Product Data Sheet

MADE IN
FRANCE

Utopia are the reference pair of headphones from Focal. As a world first, it features the only full-range and fully open-back loudspeaker, built within a pair of headphones, using pure Beryllium formed in the brand new 'M' shape dome. The acoustic quality of this exclusive solution allowed Focal to avoid the use of any crossover or passive filtering process to achieve a frequency response from 5Hz to 50kHz! The listening experience is outstanding in terms of realism, natural sound reproduction, dynamics and clarity. When listening to them, the headphones virtually disappear and the audio signal is revealed with a level of precision never achieved until Utopia. Design is also a key point, be it in regards to the way of using the headphones, comfort, as well as the aesthetic. The true lambskin leather, used on the cushions, reinforces the character of classically elegant lines, as well as the expression of comfort and overall performances.
