Required for Setup

Speaker systems	Speaker cables	Router

Optional

iOS device	Router with WPS	LAN cable

✎

- These drawings are for illustrative purposes only and may not represent the actual product(s).

Important: External Antennas

The removable external antennas are required for both Bluetooth and Wireless network connectivity. Please make sure to connect the antennas before attempting to use the Bluetooth or Wi-Fi features of the PM7000N.

❏ Connecting the external antennas for Bluetooth / Wireless connectivity

For each of the two antennas:
① Place the antenna evenly over the antenna terminal located at the upper left or right corner of the rear panel.
② Turn the antenna clockwise until it is fully connected. Do not over tighten.
③ Rotate the antenna upwards for the best possible reception.
Setup

There are six steps to the setup process.

# **1** Installing batteries in the remote control unit

Batteries

2 Connect the speakers to the amplifier

Connecting the speaker cables

① Peel off about 3/8 inch (10 mm) of sheathing from the tip of the speaker cable, then either twist the core wire tightly or apply solder to it.

② Turn the speaker terminal counterclockwise to loosen it.

③ Insert the speaker cable's core wire to all the way into the speaker terminal.
④ Turn the speaker terminal clockwise to tighten it.
